

The new 2.0TD tariff brings a new Super Off-Peak period of 8 hours a day, Monday to Friday providing the lowest prices. Unlike the previous tariffs with time discrimination, all-day Saturday and Sunday, along with national public holidays, will also be considered as Super Off-Peak periods. Unlike the previous time discrimination, the schedule will not change depending on the summer or winter clock.

To make the most of keeping your costs as low as possible, refer to the below schedule and use the majority of your consumption where possible, during the cheaper hours of the day:

Another change that is implemented for the new 2.0TD tariff is related to the potencia. Consumers now have two contracted potencia / contracted power (kW) amounts, a Peak and an Off-Peak.
